

8 Types of Pockets with Names: From Humble Pouches to Fashion Powerhouses

In the world of fashion, pockets are like helpful friends for our clothes. They have been around for a long time, starting from when people valued usefulness above everything else. Pockets weren't initially fancy decorations; they were simply there to help carry important things.

Why should boys have all the fun? Back then, pockets were quietly sewn onto the clothes of boys and men. They were practical spaces to keep essential items, not flashy additions meant to look pretty.

As time went on and people's fashion tastes changed, so did the idea of pockets. They started out as basic pouches for holding coins, handkerchiefs, and everyday stuff. Eventually, they came in all sorts of shapes and sizes. Pockets stopped being just useful; they became a way to add personality and style to clothing through their design and placement.

Placement is the key. Where pockets are placed on a piece of clothing is really important. A good spot means you can reach into your pocket easily. For example, pockets near the top of a garment, like at the chest, are great for quick access to small items like pens or a handkerchief. On the other hand, pockets lower down, around the waist, are handy for bigger things without changing how the clothes look.

Types of Pockets

#1 Patch Pockets

PLEATED PATCH POCKET

RUFFLE PATCH POCKET

Pockets

Oh, the possibilities! These types of pockets are stitched directly onto the outer layer of your garment, making them perfect for adding a pop of color, pattern, or texture. The beauty is in the variety – patch pockets can be classic squares or rectangles, circles for a playful touch, or even funky shapes like triangles or chevrons.

And the fun doesn't stop there! Want a more polished look? Add a little pocket flap that buttons or snaps shut. Feeling whimsical? Pleats or tucks can add dimension, while lace or ribbon trim creates a touch of romantic flair. The possibilities are endless!

Here's a cool insider tip: patch pockets can be lined or unlined. Lined pockets offer a more finished look and extra durability, especially for frequently used items. Unlined pockets are a great lightweight option and can be a fun way to show off a contrasting fabric peeking through. So unleash your inner designer and have fun creating patch pockets that are as unique as you are!

#2 Slash Pockets

Pockets

The sleek entrance to your garments. These types of pockets are the diagonal beauties you see on many garments, from dresses to jeans. Imagine a secret door on your clothes! A diagonal cut is made into the garment, creating the pocket opening. These types of pockets are stitched just above the chest line, waistline, or hip line. It is made at the inner side of the garment by making a cut on the main garment. The pouch of pocket, in this case, hangs on the wrong side of the cloth.

But how do you keep things from spilling out? That's where different finishing techniques come in, each creating a unique pocket style:

- **The Classic Slash:** This is the basic version, with the raw edges of the cut reinforced with stitching or binding for a clean look.

Now, let's explore some upgraded slash pocket variations:

#3 Welt Pockets

This is a type of slash pocket. In this case, a wider strip of fabric (the welt) is sewn around the slash opening, creating a more defined and elevated finish.

#4 Bound Pockets

Similar to welts, but with a narrower strip of fabric (binding) for a slimmer, more minimalist look. It is also known as a double-welt pocket.

#5 Flap Pockets

Imagine a mini envelope! A separate piece of fabric folds over the pocket opening, often secured with a button or snap. These types of pockets add a touch of visual interest and keep your belongings extra secure. Both patch and slash pockets can be called flap pockets if they have a flap.

#6 Zipper Pockets

Want ultimate security? Slash pockets can be transformed by stitching a zipper along the opening. This creates a functional and stylish option for jackets and pants where you need to keep valuables safe. However, in fashion, the sky is the limit on possibilities. You can use zippers in patch pockets as well. It depends on your style and imagination.
